

# CURRICULUM-ALIGNED INTERACTIVE CONTENTS

**Motto:**

*Make education fun and easy*

# ABOUT US

We provide a digital interactive learning materials which serves as an alternative to physical textbooks.

Our content is an all-in-one, curriculum-aligned teaching and learning platform where lessons are delivered with interactive contents.

Edubbey provides **efficient, impactful** teaching and helps students become **active** learners and teachers conducts interactive and engaging classes.

*Click PLAY to find out more!*

## Bringing technology and pedagogy together

Edubbey is a unique Edutech platform where we provide engaging contents for learners and educators:

Curriculum-aligned interactive textbooks with engaging content, including videos and 3D models

Immediate feedback of student progress in the interactive activities

Extra provision of Question banks with the Cambridge past year questions

## Why Edubbey Interactive Contents?

- Cambridge curriculum-aligned
- Ready made interactive slides for teachers as they don't have to worry to create their own contents
- Formative and summative assessments are provided at the end of each topic with past year questions
- Students can study with ease and fun as the contents consist of T/F, multiple choice, drag & drop, interactive video and so on
- It is high quality and cheaper as it replaces textbooks
- More features and updates are constantly added.

## Edubbey in numbers

In partnership with

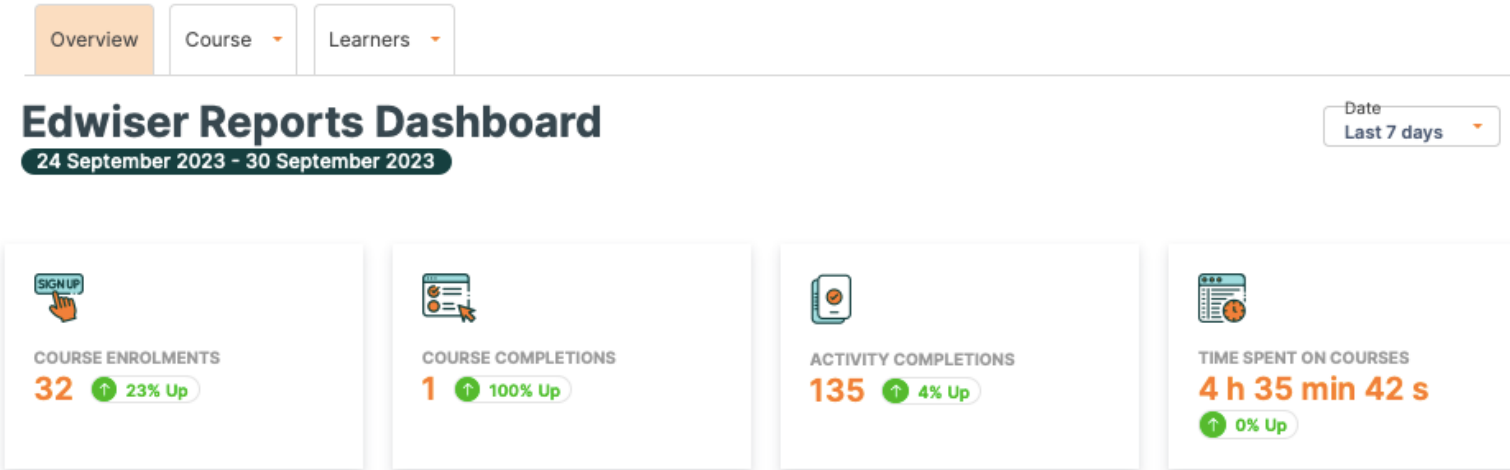

98%

of students feel that Edubbey interactive contents has helped them a lot to enjoy studying and get higher score.

95%

of teachers believe that Edubbey enhanced students' engagement and makes teaching easier for them.

With the interactive contents, our system also has a comprehensive student reports which enable the teachers and admin determine the student progress at a glance.

Can view total number of students using the system.

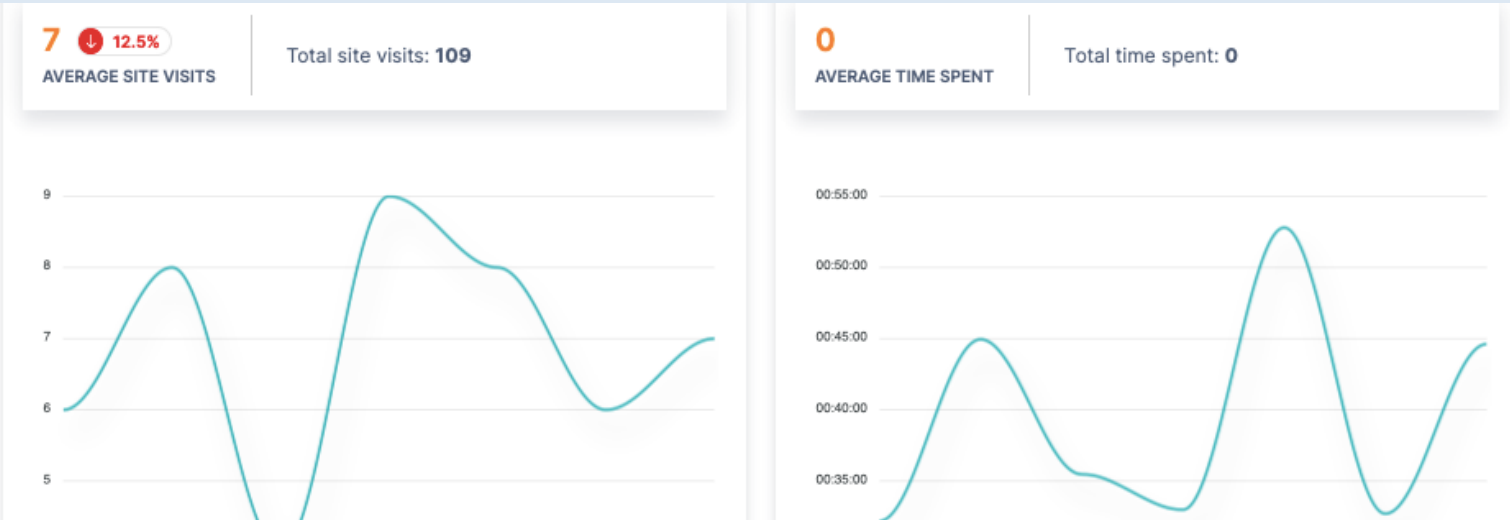

Can view total number of students completed a course.

Can view how many students completed activities in a course.

Total number of time students spent to study.

The teachers and admin can monitor how the system is used, how many visits the system get in a day, week, month and year. This feature is fully customizable and will allow the admin to determine the effectiveness of the system. Also, the admin can determine average time spent by a user, this will allow monitoring of student learning activities in the system.

## Course Progress
